WORK EXPERIENCE

Pinnacle Plus Financial, Overland Park KS — *Software Engineer*

June 2016 - Present

Worked in Ruby on Rails to improve custom CRM. Integrated with a variety of other systems including InsideSales and Mailchimp to facilitate automated transfer of data. Listened to suggestions provided by employees and worked with supervisors to plan out 2 week project sprints. Also maintained public Wordpress site.

Mersoft, Overland Park KS — *Software Developer Intern*

June 2015 - May 2016

Worked with Ruby on Rails to improve a custom CRM for the client Pinnacle Plus Financial. Communicated directly with the client to understand needs and demonstrate new features. Collaborated with team members.

KU CEHCUP, Lawrence KS — *Software Developer*

February 2015 - May 2015

Design and develop a web toolkit for the clients of the Center for Excellence in Health Communication for Underserved Populations. Work with supervisor and clients to determine requirements for projects. Create web and mobile interfaces for research projects utilizing Ruby on Rails and Twilio for text message communication.

EDUCATION

University of Kansas, Lawrence KS

Bachelor of Science in Interdisciplinary Computing

Fall 2012 - Spring 2016

Minors in Astronomy and Mathematics. Cumulative GPA: 3.81
Involved with Theta Tau Professional Engineering Fraternity, and held positions as Web Chair, Professional Development Chair, and the Head of the Bylaws Committee.

ACTIVITIES

Rails Girls Kansas City — *Mentor Coordinator*

Rails Girls is an event through KC WiT designed to help introduce women and girls to web app development. It is a weekend workshop with a curriculum designed to lead attendees through building their first Rails App and hosting it online to show off to their friends and family. As mentor coordinator I manage the application process for our volunteers and instruct them on the curriculum they will be working through with our attendees.
